-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-15, 29-47, 50 and 51, are drawn to machines adapted to assembling and packaging a dental product, classified in class 53, subclass 467.

Group II. Claims 16-24, 48, 49 and 52, are drawn to a method of assembling a dental device, classified in class 433, subclass 45.

Group III. Claims 25-28 and 53, are drawn to the fixtures of a dental device, classified in class 433, subclass 25.

2. The inventions are distinct, each from the other, because of the following reasons:

Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group I does not disclose the means for automatically closing off the second end of the dental product, as claimed in the process of Group II. Nor does the machine of Group I disclose a closure station, which is also claimed in the process of Group II.

Inventions Group I and Group III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by

Art Unit: 3721

another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus of Group I can be used to make a product that does not include the specified fixtures of Group III.

Inventions Group II and Group III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the fixture of Group III can be made by a process that specifically addresses the closer member of Group III, unlike the process of Group II.

Because these inventions are distinct for the reasons given above and the search required for each of Groups I, II and II are different, the restriction for examination purposes as indicated is proper.

3. A telephone call was made to Applicant's representative, Anthony G. Fussner (Reg. No. 47,582), on October 26, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gloria R Weeks whose telephone number is (703) 605-4211. The examiner can normally be reached on 9:30 am - 8:00 pm Monday-Thursday.
